

# CUSTOM FABRICATION

TCH is a global fabricator that provides custom metal hose solutions for difficult applications to a diverse customer base. We provide a complete fabricated solution for commercial and industrial markets. Our experienced sales team will help you choose or design the right assembly for your application.

## SOLUTIONS

We domestically fabricate custom metal hose products, piping arrangements, and steel piping manifolds. We fabricate to our customers' specifications and satisfaction. Contact us if you have a complicated project that demands customized parts. We are ready to discuss these applications and how we help you achieve your goals for your next project.

## ADVANTAGES

- Large fitting pipe and hose inventory, ensuring quick turn-around times
- Custom assemblies are manufactured in house giving you short lead times
- All custom parts and products are tested at the TCH factory so you can install with confidence
- Our ASME certified welders have years of hose experience and are experts with difficult fabrications
- Product cleaning is available for cryogenic and medical gas hose or any application that requires this service
- Facility manufacturing in accordance with ASME B31.3

**TCH CAN MEET YOUR CUSTOM FABRICATION REQUIREMENTS - CALL TODAY!**
