

# RESUME

## OBJECTIVE

As a leader in the metal hose and expansion joint industry, our goal is to provide flexible connectors, expansion joints and custom fabricated products to you for the industries you represent. Our success is a direct result of our dedication to providing the highest quality product to our customers

## INDUSTRY EXPERIENCE

100 YEARS

- Our sales staff has over 100 years combined experience in the industry
- We provide full customer service with our technical and sales personnel. All of our representatives are experienced & trained in technical & applications of metal hose & expansion joints
- We work with diverse customer markets including Industrial, Cryogenic, Wholesalers, Gen-Set Exhaust, OEM and LP Gas
- We have representatives & distributors who serve Commercial HVAC and Industrial industries

## FACTORY OVERVIEW

Manufacturing and quality control standards are in accordance with **ASME B31.3**

MANUFACTURING IN ACCORDANCE WITH

We manufacture an average **12,000** metal hose assemblies per month

All of our fabricated products are leak tested **in-house** to ensure the highest quality

We are a leading global manufacturer and supplier of **metal hose assemblies, seismic V's, U's, & expansion joints**

**38+ YEAR** reputation is continuously built on quality, reliability & fast response

## CERTIFICATIONS USA & CANADA

### • UL® Classified for Water Quality

*Assemblies built in accordance with NSF/ANSI 61 & NSF/ANSI 372 standards*

### • UL® Listed for Fire Sprinkler Systems

*V & U Assemblies used in sprinkler systems; in accordance with NFPA 13*

### • CRN (Canadian Registration Number)

*Manitoba, Ontario, Alberta, British Columbia, Québec, & Saskatchewan; safety standards approved by TSSA*

## WAREHOUSE

We have an extensive warehouse of raw materials, resulting in products that are quickly and easily manufactured for fast lead times.

## FABRICATION SHOP

Custom and standard metal hose assemblies are all U.S.A. fabricated in-house. Our assemblies meet the Buy American Act and we can fabricate a complete domestic product.

## WELD SHOP

We have factory trained and **ASME certified** welders working in two shifts, resulting in the continuous fabrication of custom and stock assemblies.

## TESTING SHOP

All of our fabricated products are leak tested in the factory so you can install them with 100% confidence.

## STOCK WAREHOUSE

We have the industry's largest stock inventory to ensure products are always available when you call in your order. In most cases, in-stock products will ship out the same or next day once an order is placed.

## CLEAN ROOM

Our in-house clean room removes all oil and debris from assemblies. This process is commonly used for oxygen service, but can also be used for custom applications. Our sanitary assemblies are cleaned, capped, bagged and shipped, ready for installation.

## SUMMARY

• Our stock assemblies are fabricated using standard materials such as stainless steel, carbon steel, copper and bronze. We offer custom assembly fabrication, which can include exotic alloys such as Hastelloy™, Monel™, and Inconel™. We can furnish assemblies with any style of end fitting that you may require.

• All of our metal hose assemblies are fabricated at the TCH factory in Rogers, Minnesota. Our renowned quality assemblies are credited to our in-house fabrication and are not imported.
